

For the two days of January 19th (Tues.) and 20th (Wed.), at Fujimidai Elementary School and Shonandai Elementary School in Fujisawa city, Kanagawa prefecture, Japan, Isuzu cooperated in the "Orchestra Factory" by the Kanagawa Philharmonic Orchestra.

This activity, which was for a second year this time, aims to have children experience "many people putting their hearts and efforts together to create a wonderful "thing" (= "music")" by listening to and co-performing with a live orchestra and imagine what making things (monozukuri) in a factory is like. This year as well we were able to bring a moving experience to many children.

Children listen attentively to the orchestra performance

Children fascinated with the colors and shapes of the instruments

A dream co-performance with the orchestra
